

NEWS RELEASE

OLAM REPORTS Q1 2015* PATMI OF S\$31.3 MILLION

Strong underlying performance with Operational PATMI (PATMI without exceptional items) rising 25.7% to S\$128.5 million

- Reported PATMI in Q1 2015 down 92.1% to S\$31.3 million mainly on the difference in exceptional items: One-off gains of S\$293.9 million in Q1 2014 compared to a one-off loss of S\$97.2 million in Q1 2015 mainly from the buyback of bonds, which is expected to generate interest cost savings of S\$55.0-60.0 million per annum over the next 3 years
- Operational PATMI increased 25.7% to S\$128.5 million with underlying growth in all segments except Food Staples & Packaged Foods. This was despite the adverse impact of continuing currency devaluation in some markets. Earnings Before Interest, Tax, Depreciation and Amortisation ("EBITDA") marginally down by 1.5% to S\$330.1 million
- Completion of 20 strategic initiatives since April 2013 has released S\$966.1 million of cash, generated a P&L gain of S\$125.2 million and added S\$154.2 million directly to capital reserves. The completion of the sale of a 25.0% stake in the Packaged Foods business to Sanyo Foods Co. Ltd ("Sanyo Foods") in Q1 2015 released S\$219.1 million of cash and added S\$106.2 million to capital reserves
- Generated positive Free Cash Flow to Firm ("FCFF") of S\$120.2 million in Q1 2015 against negative S\$424.8 million a year ago on higher operating and divestment cash flows, lower working capital requirements and net of the investment in McCleskey Mills Inc. ("MMI") of S\$225.9 million
- Net gearing of 1.83 times as at March 31, 2015 lower than the 2.03 times as at March 31, 2014 and in line with 2016 goal at or below 2.0 times

*Please note the Company announced a fiscal year-end change from June 30 to December 31. The quarters ended March 31, 2015 and March 31, 2014 are now referred to as Q1 2015 and Q1 2014 respectively. See additional explanation in the "Notes to the Editor".

Consolidated Financial Results for the Quarter ended March 31, 2015 (S\$ million)	Q1 2015	Q1 2014	% Change
Volume ('000 MT)	2,682.8	4,018.0	(33.2)
Revenue	4,321.1	4,836.4	(10.7)
EBITDA	330.1	335.3	(1.5)
PAT	27.6	392.9	(93.0)
PATMI	31.3	396.1	(92.1)
Operational PATMI	128.5	102.2	25.7

Singapore, May 15, 2015 – Olam International Limited (“Olam”, “the Group” or “the Company”), today reported strong underlying operational performance for the three months ended March 31, 2015 (“Q1 2015”).

Operational Profit After Tax and Minority Interest (“Operational PATMI”), which excludes exceptional items, was up 25.7% to S\$128.5 million. The performance was achieved despite the continued adverse impact of currency devaluation against the US dollar on Olam’s import and domestic distribution businesses in some markets.

Reported PATMI was down 92.1% compared to the previous corresponding period (“Q1 2014”). This is largely because of the swing in exceptional items in the two periods – in Q1 2014, the Company had reported net exceptional gains of S\$293.9 million largely from the revaluation of its stake in PureCircle Limited as well as the sale and leaseback of its almond assets in Australia, while Q1 2015 included a net exceptional loss of S\$97.2 million resulting mainly from the buyback of outstanding US\$750.0 million 6.75% bonds due 2018. The bond buyback is expected to generate interest savings of about S\$55.0-60.0 million per year over the next three years.

Sales volume fell 33.2% as a result of the Company’s deliberate strategy to grow in prioritised platforms while reducing volumes or exiting from lower-margin business. Revenue declined 10.7% to S\$4.3 billion as lower volumes were offset by higher prices of some commodities.

EBITDA fell by a marginal 1.5% to S\$330.1 million. All business segments except the Food Staples & Packaged Foods segment achieved higher EBITDA. This was despite the estimated net negative impact on EBITDA from currency devaluation of about S\$12.0 million.

The Q1 2015 results also included a higher net loss of S\$14.7 million on the fair valuation of biological assets compared to a net loss of S\$8.7 million in Q1 2014.

Olam reported positive Free Cash Flow to Firm (“FCFF”) of S\$120.2 million during the current period, a significant improvement from negative S\$424.8 million a year ago. This was mainly because of higher operating and divestment cash flows, as well as lower working capital requirements.

Olam has completed 20 strategic initiatives since April 2013, which released cash of S\$966.1 million, generated a P&L gain of S\$125.2 million and added S\$154.2 million to capital reserves. This includes the sale of a 25.0% stake in the Packaged Foods business to Sanyo Foods which was completed in Q1 2015, releasing cash of S\$219.1 million and adding S\$106.2 million to reserves.

Capital expenditure (“Capex”) incurred in Q1 2015 was S\$301.5 million as compared to S\$180.0 million in Q1 2014. This included a S\$225.9 million investment to acquire MMI which was not part of the strategic plan Capex guidance. Excluding the MMI investment, Capex for the period would be \$75.6 million or 58.0% lower than Q1 2014.

Net gearing as at March 31, 2015 was 1.83 times, lower than the 2.03 times a year ago, and is in line with the 2016 target at or below 2.0 times.

Olam’s Co-founder, Group Managing Director and CEO, Sunny Verghese said: “Excluding the headline impact of exceptional items, our strong underlying performance in Q1 2015 is testament to the disciplined execution of our strategic plan initiatives.

“We continue to pursue our twin objectives of profitable growth and cash flow generation while investing in selective opportunities that can enhance shareholder value over time. We successfully completed the MMI acquisition in the US as well as the strategic partnership with Sanyo Foods in the Packaged Foods business in this quarter and expect to complete the ADM cocoa acquisition by the end of Q3 this year. Successful completion and execution of these strategic initiatives will position us for further growth in three of our large prioritised platforms.”

Segmental Review

Segment	Sales Volume		Revenue		EBITDA	
	Q1 2015	Q1 2014	Q1 2015	Q1 2014	Q1 2015	Q1 2014
Edible Nuts, Spices & Vegetable Ingredients	234.7	283.6	875.7	773.4	97.1	84.7
Confectionery & Beverage Ingredients	479.6	464.6	1,710.7	1,526.1	83.4	77.2
Food Staples & Packaged Foods	1,657.8	2,860.9	1,139.0	1,828.1	80.0	122.0
Food Category	2,372.1	3,609.1	3,725.4	4,127.6	260.5	283.9
Industrial Raw Materials (IRM)	310.6	408.9	595.7	708.5	58.5	55.7
Commodity Financial Services (CFS)	N.A.	N.A.	0.0	0.3	11.0	(4.3)
Non-Food Category	310.6	408.9	595.7	708.8	69.5	51.4
Total	2,682.8	4,018.0	4,321.1	4,836.4	330.1	335.3

Volume in '000 metric tonnes; Revenue & EBITDA in S\$ million

The **Edible Nuts, Spices & Vegetable Ingredients** segment posted a 13.2% growth in revenues in Q1 2015 despite a 17.2% decline in volumes, primarily on elevated prices for almonds, hazelnuts and pepper. EBITDA grew 14.6% as the almonds business continued to do well given the higher prices, as did the US spices and vegetables business, but the upstream peanut business in Argentina was affected by lower prices and the improved competitiveness of the US peanut industry in the export markets.

The **Confectionery & Beverage Ingredients** segment recorded a 12.1% increase in revenue on a 3.2% increase in volumes and higher cocoa prices compared to the previous corresponding period. The fall in coffee prices during Q1 2015 has resulted in market illiquidity but market conditions are expected to normalise over the next few quarters. EBITDA grew 8.0% with contribution from both Coffee and Cocoa platforms.

Food Staples & Packaged Foods volumes and revenue fell 42.1% and 37.7% respectively on the back of the deconsolidation of the Grains business in Australia and the discontinued operation in South Africa. Although the rest of the Grains business as well as the Rice distribution, Sugar and Dairy supply chain businesses performed well during this period, overall segment EBITDA declined by 34.4%. This was due to the reduced volumes from discontinued operations, the continued underperformance of Dairy farming operations in Uruguay and the impact of currency devaluation on Packaged Foods and the Palm refining and distribution businesses in Nigeria, Ghana and Mozambique. This adverse margin impact of currency devaluation is expected to continue in the near term.

The **Industrial Raw Materials** segment recorded a 24.0% fall in volumes due to lower Fertiliser and Wood Products volumes, while revenues fell 15.9% due to lower volumes and lower cotton prices as compared to the prior corresponding period. However, EBITDA grew 5.0% due to higher contribution from the Cotton business and the restructured Wood Products business, partially offset by lower contribution from Rubber, Fertiliser and the SEZ business.

The **Commodity Financial Services** registered an improved EBITDA of S\$11.0 million in Q1 2015 versus a loss of S\$4.3 million in Q1 2014.

Olam's Executive Director of Finance and Business Development, A. Shekhar said: "We are pleased with the steady improvement in operational performance across nearly all our business segments during the quarter. We are also actively managing our longer-gestation projects across different business segments, which are expected to be significant contributors as these earnings progressively come onstream.

"The execution of the bond buyback in this quarter is another successful step towards optimising our debt tenor and cost. We are pleased to report that the positive impact of the various actions taken over the last 12 months is now beginning to reflect in reduced interest costs on an ongoing basis," he added.

Outlook and Prospects

The long-term trends in the agri-commodity sector remain attractive, and Olam is well-positioned to benefit from this as a core global supply chain business with selective integration into higher value upstream and mid/downstream segments. Olam believes its diversified portfolio with leadership positions in many segments provides a resilient platform to navigate uncertainties in global markets.

.

Notes to the Editor:

1. *The Company announced a fiscal year-end change from June 30 to December 31. The change will enable the Company to align its fiscal year to comply with the group consolidation and reporting requirements of its majority shareholder. With this change, the Company's current fiscal year, which began on July 1, 2014, will end on December 31, 2015. Thereafter, the Company will follow a January to December fiscal year. The quarters ended March 31, 2015 and March 31, 2014 are therefore referred to as Q1 2015 and Q1 2014 respectively. To allow a like-for-like period comparison, you can find pro-forma financial information in line with the new fiscal year for the financial years ended December 31, 2014, 2013 and 2012 on our website.*
2. *This release should be read and understood only in conjunction with the full text of Olam International Limited's Q1 2015 Financial Statements and Management Discussion and Analysis lodged on SGXNET on May 15, 2015.*
3. *The strategic plan announced after Olam's strategy review in April 2013 is premised on "rebalancing profitable growth and cash flow" with the view of generating and sustaining positive Free Cash Flow to Firm (FCFF) assuming constant prices.*
